Re: Addendum No. 2 – Towne Center Blvd (T-2314) & Grandin Road (T-150) Extensions East of SR 48 – Part B

Dear Prospective Bidder:

Listed below is Addendum No. 2 for the referenced project. Please note the following clarifications/modifications to be included in your bid price.

ADDENDUM NO. 2

1. **Additional Information - CB 3, Sta. 46+00, 22.07' Lt:** Contractor question received indicating that two of the four pipe inverts were provided. Both 12" inverts, south and east, are 785.81, the 18" invert (north) is provided- 784.23. The 15" invert (west) is 784.48.
2. **Additional Information - Engineer's Estimate:** \$2,200,000.
3. **Clarification - Item 8, Excavate, Remove 12" Sacrificial Layer:** Contractor question received whether or not this work will be performed. Yes, the Contractor should assume that it is as indicated in the plan.
4. **Clarification - Items 11 and 16, Proof Rolling vs Test Rolling:** Contractor question. The terminology for CMS specification 206 related to stabilized subgrade uses the term "Test Rolling" and refers back to the 204 specification for "Proof Rolling". Seemingly redundant though these items are to be bid as provided.
5. **Quantity Revision - Item 48, 611 Spec, 12" Conduit, Type B:** Bidders are to revise their bid quantity for Item 48 from 430 Lin. Ft. to 358 Lin. Ft. Note also that the 45 Lin. Ft. 12" pipe run shown between 49+75 and 50+19, left is Type C though noted as Type B on page 65/78. This is already correctly included in the bid tab with Item 49.

Addendum No. 2 shall be signed and included with the submission of the bid. Please sign below and enter the date you received this addendum. **Any bid submitted without the signed Addendum No. 2 may be rejected.** Please contact David Mick, P.E. at 513-695-3308, David.Mick@co.warren.oh.us.
