

## Basic Crime Scene Processing

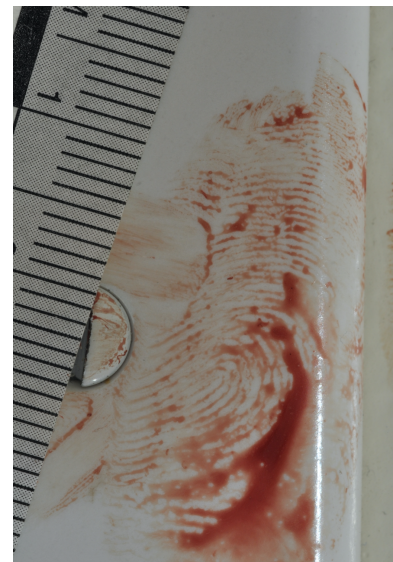

Attendees will be introduced to a comprehensive overview of crime scene investigation processes. This 40 hr. IAI approved course teaches crime scene processing from a holistic view. The objective of this course is for the participant to be able to demonstrate proper documentation, identification, collection, interpretation and preservation of evidence. Each module begins with lecture and finishes hands-on for the investigator to practice what they learn.

### **Topics:**

Crime Scene Preservation  
Evidence Recognition  
Documentation  
Evidence Collection  
Biological Evidence  
Shooting Scenes  
Bloodstain Pattern Recognition  
Impression Evidence  
Latent Print Collection/Documentation
